## SUMMARY

---

Full-stack engineer with 4+ years of experience building enterprise platforms and healthcare SaaS. Experienced in owning frontend-heavy product features end-to-end, improving platform reliability, building user centric features with AI-assisted development workflows.

## SKILLS

---

**Languages:** Java, JavaScript, Python

**Frontend:** React, Material UI, Tailwind CSS, Bootstrap, HTML, CSS

**Backend:** Node.js, Express, Flask

**Database:** MySQL, MongoDB

**DevOps:** Docker, Nginx, Git/GitHub

**Cloud:** AWS, GCP

**Practices:** REST API design, Agile, security hardening, AI-assisted engineering

**Additional:** Data Structures and Algorithms, Backstage.io

**Operating Systems:** Mac, Linux, Windows

## WORK EXPERIENCE

---

**Software Developer (Remote-Israel)**  
SmartClinic

**Jan 2025 – Present**  
Tel Aviv, Israel

Work as a Full-Stack Developer (frontend-heavy) building a healthcare SaaS platform that helps therapists manage user records, scheduling, and documentation.

- Own end-to-end feature delivery using React, Node.js, Express, MySQL, and AWS from requirement analysis to production release and stabilization.
- Lead frontend modernization with MUI v5, Hebrew localization, and design-spec alignment to deliver a consistent cross-platform user experience.
- Strengthen calendar and recurring-meeting architecture, including recurrence edge cases, update consistency, and high-volume Google sync notification handling.
- Contribute to Green Invoice integration and harden error-state handling for external billing/accounting connectivity scenarios.
- Own AWS testing-environment operations, including setup, maintenance, deployment support, and environment-level troubleshooting.
- Drive security and platform quality improvements through dependency vulnerability fixes, stricter API authorization checks, and secure coding best practices.
- Currently implementing 2FA to improve authentication security and strengthen account protection.
- Collaborate in Agile sprints, perform code reviews, and improve engineering quality through shared standards and best practices.
- Apply an AI-first development workflow (LLM pair programming, AI-assisted debugging, edge-case generation, and PR review support) to accelerate delivery while maintaining production-grade quality.

Worked as a Full-Stack Engineer (Frontend-heavy) for Apple and Waymo contributing to internal tools, scalable and high-performance applications.

- 7x On-the-Spot Award for critical project contributions
- Recognized with Smiles Award and Contextual Master Award for engineering impact and collaboration

**Apple (Aug 2021 – Jan 2024)**

- Built and shipped a Backstage.io Developer Portal with React, TypeScript, MUI, and Node.js to improve discoverability and collaboration.
- Designed and implemented custom UI components in MUI, ensuring consistency across the portal.
- Integrated Apple's LDAP authentication for seamless user verification.
- Set up a GitHub App to integrate Backstage, enabling repository management directly from the portal.
- Resolved 50+ bugs/feature requests and organized InfoSec events attended by 150+ people.

**Waymo (Feb 2024 – Jan 2025)**

- Built and Enhanced applications focused on BOM/EBOM management, tracking materials, footprints, and component-level engineering data.
- Developed a chatbot based data capture flow to collect user inputs, persist records to the database, and synchronize updates across multiple internal applications, streamlining workflows and reducing manual effort.
- Optimized frontend performance for large-scale data handling, ensuring seamless UI interactions.
- Partnered with cross-functional engineering and product stakeholders in Agile sprints.

Built and deployed a B2C venue-booking platform using MERN + AWS from scratch.

- Built the complete application using React (Frontend), Node.js (Backend), MongoDB (Database), and AWS (Cloud Services).
- Configured AWS S3 storage for media/documents and deployed workloads on EC2.
- Developed a secure user authentication system and implemented OTP-based verification, reducing fake registrations by 90%.
- Successfully increased **customer engagement by 300%**, driving business growth.

## CERTIFICATIONS

---

- [Microsoft Certified: Azure Fundamentals AZ-900](#) (Microsoft)
- [Design and Analysis of Algorithms](#) (NPTEL - Gov. Of India)
- [Programming, Data structure, and Algorithms using Python](#) (NPTEL - Gov. Of India)
- [Introduction to Git and GitHub](#) (Google)
- [The Web Developer Bootcamp](#) (Udemy)
- [Blockchain A-Z](#) (Udemy)
- Code-elite Hackathon | 18-hour-long hackathon organized by Virtusa | Runner-up | Developed an Android Application to find the current weather information
